About This Game

An adventure game with visual novel-style narrative, Minotaur tells a dark mystery story set in a newly created science fantasy world. It is a game inspired by Zero Escape and Danganronpa series, various visual novels and old-school point-and-click quests by LucasArts, Sierra and others.

GAMEPLAY

A picture is worth a thousand words! And demo is just... priceless. Download our 0.2 demo for PC/Mac to try Minotaur out.

A short summary of main gameplay features (0.2):

- point-and-click exploration and puzzle solving,
- visual novel-style narrative in complete voice over by a great cast,
 - rich and detailed sci-fi setting,
 - character skills,
 - hint system.

Coming in Early Access:

-
- timed sequences and boss fights,
 - multiple choices which affect progression and endings,
 - enhanced UI and controls (lots and lots of hot keys and sound control options),
 - Ollie in a swimsuit.

If you're stuck at Nod's or Maya's, check out our spoiler-free walkthrough (use the link to the manual).

GRAPHICS

Minotaur is a 2,5D game with 150+ animated backgrounds. At the risk of sounding cocky, we think it looks really cool. And its native resolution is full HD.

STORY AND CHARACTERS

Minotaur tells a story about a group of nine characters (five of which are playable) who find themselves unable to leave their own home. Tensions rise as things start to take turn for the worse and it becomes clear that their unfortunate situation is not an accident, but a trap of elaborate design. Revealing the identity of its creator and understanding their motives is now the matter of life and death.

The story unfolds from perspective of five different characters, and although you can only unlock routes in succession, your actions and choices in each of them have universal effect and lead to one of four different endings.

SETTING

We created our own universe with blackjack and hook... sorry, demons and penguins. We called it The Universe of Seven. It's a very detailed science fantasy world with its own history, geography, rulebook and characters. We hope that Minotaur will be the first in a series of games set in U7. Other U7 projects we're currently working on are Red Crown, a novel scheduled for 2018 and a prequel to Minotaur, and a board game.

...

We hope you like Minotaur (remember that you can check out our 0.2 demo to get a better feel for the game). Let us know what you think, feedback is important. We listen and try to make Minotaur better. And don't forget to add us to your Steam wishlist :

)

See you soon in Nova!

DONT BUY THIS...okay being a person whos been into game design for over 20+ years i must say this is absolute garabge Graphics,gameplay,controls everything is horribly done...uses unity assets as well and dev needs to learn game design before making a complete joke of themselves on steam...not worth a penny really its that bad...

To Dev....take this garbage down no one is going to buy it...grow up a bit got serious feeling ur a kid making this by the way this entire game is baddly designed and the stupid tutorial telling people about eating and learn proper game design and playing 6 mins of this junk is a nightmare in it rightly own and im into unreal 4 dev myself much better engine to work with and dev tools than Unity which im also familiar with ;)

I get ur into game design... well learn it properly and stop wasting ur time on a pet project that ur charging people money for that is awful in every aspect and makes urself actually look bad in the end...Dont mean to be harsh its the fact of the matter and like seeing people with a passion for this stuff actually go some were with it...Take this garbage down and take some serious advice from some one who knows game design alot. Weird, dark, slow, horrible AI, annoying background music and etc...

For the developer:

I played only 0.1 hours because it was all the time I could handle playing this thing!

That was just the tutorial? Ok, well, it's the WORST tutorial experience I ever had.

I uninstalled it already and I will never play it again, for sure!. I thought this game looked good. At least different than the other inexpensive games that have been coming out. The controls are bad. The combat is even worse. I would just ignore this game even exists.

I initially gave this game a thumbs down. The developer responded to my complaint and is fixing the problems I had. Never had a developer care about the consumers.. Hey there!

So far I think it's a nice game for an early access I mean games like Ark or PUBG had problems aswell and look what they are now, but that's not the point.

For being a great experience I think you should

- turn the music in the tutorial a bit down cause it's loud for my opinion the next levels were fine from musical background

- change the controlls to fit the Hack and Slay playstyle more

- adding a Story (maybe a few cut scenes) cause I felt a bit lost why this Minotaur is going on a rampage

- adding more animations (the animations so far are fine but the game doesn't look fluid in the animation style

and as last point

- maybe some personalisation options (skilltrees, unlock able outfits and weapons, maybe female minotaur)

otherwise it's a funny game so far and I'm curious what the next updates will bring. There's plenty of room for improvement in this game, but from the way it's looking it won't be improved very much. The combat is really really bad, and that's pretty important. I wouldn't recommend picking this one up unless it's changed really seriously. See the following video for gameplay, it's really not good:

<https://www.youtube.com/watch?v=db9PguB1Wl4>. The Dark Souls of unity asset flips

Being an early access game, I can only say this game has a lot of room for improvement. The Minotaur character looks good, but that is about it. The controls stink. I cannot find a way to pull the camera back out once it zooms in during fighting. Oh...and there is no clear way to close the game. Nothing in the menu says "log out" or "end game". Had to Alt-Tab out and kill the process.

I hope this game gets better.. Its hilariously bad. Its so bad I actually recommend it for people to see how bad it can really be. Seriously.

Humming? [L]:

I don't know maybe I'm just going crazy, or it's just old electronics.
I started this part time thing working the nightshift at a pizza joint.
Get a few bucks for school and whatnot.

All in all its easy money but lately around midnight I swear I hear a small girl humming the restaurants jingle, then I get a headache.

Probably nothing just can't shake this feeling.

Mike. About window mode support.:

Please refer to this guide for changing from full screen to window mode.

<https://steamcommunity.com/sharedfiles/filedetails/?id=1387733919>. **MAC Install Issue:**

We released our Mac build last Friday, but there appears to be some technical problems with initialising a Mac-specific build on some machines. We are looking into this problem urgently and we'll get a fix out as quickly as possible. We are really sorry for any inconvenience caused and we hope those affected will be able to play the game fairly soon.

Thanks for understanding.. **Luvocious v1.3 Update!:**

Hello guys again and welcome to another update of Luvocious.

A couple of things have changed and I hope you can enjoy the game even more because of them.

Keep in mind that for those of you who are lost on anything, there is a guide on the community hub and obvious pointers hidden

throughout the game.

Let us waste no time and get to these new updates!

-Modern-

-Added in 3 songs to Alte's laptop in his apartment. Featuring two from Solenars Edge Heroes.
-Stat Changes.

-Fantasy-

-Added in an optional Orc Squad battle in Almachia.
-Expanded Almachia and added more explorable areas.
-Added in an optional mini-boss with Sister Dry V. and Big Beef Gai.
-Added more interactable objects.
-Added in Bachnora as an explorable town.
-Added the ability to fast travel between the towns.
-Changed prices of some items.
-Made some fights easier.
-Party members follow you in dungeons.

-Futuristic-

-Buffed the stats of all party members.
-Weakened some enemies.
-Lowered price of Demonic Bazooka.
-Added in a few Abyss creatures.
-Added in a save point near Sen's ship as a safety precaution.
-Added in waypoint markers to show the player how to get to the research facility safely.

-Velvet's Era-

-Added in the Item shop.
-Made the final boss much easier.

-All Eras-

-Slightly Improved VR. *VR IS STILL IN BETA*
-Added in the functionality of recovering from K.O. and Poison while resting at an Resting Lodge/Inn.
-Interface and Item changes.

. **The best gift for sale - 100\$:**

From 04.02.2019 to 11.02.2019 - minimal price for all KuKo games and DLC.

And i release new game 100\$.

<https://store.steampowered.com/app/1016250/100/>

This is the best gift for your friends. 100\$ for 50 cents....

. **Update V2:**

Despite that I said im going to make the updates on Friday to Friday there are few bugs that needs to be fixed so here is an update.

Whats new:

- Leaderboard system implementation started but not complete.~
- Localization of few different texts are added

-
- Few bug fixes related with UI fixed.
 - Enemy AI is now a bit more difficult. So they will see you quicker. Watch your back!!!

What will be in the next updates:

- Language supports for: Turkish, Spanish, French, Czech, Chinese, Russia, German
- Better camera movements. Most likely this system will work with different buttons instead of automatic movement.
- Level design improvements
- Tutorial on/off system to shut the tutorials if you don't want to see them
- Some improvements to music, mainly to character step sounds and end of level music.
- Some improvements to existing puzzles
- Steam leaderboard system (if possible)
- All achievements implementations
- Mac build of the game
- Few different store and achievement localizations
- Xbox control system
- Other hidden bugs and improvements..

Do let me know if you have any suggestions.

Thank you

Yigit
